Professional Profile

Backend Developer with experience in Java, Spring Boot, databases, and Cloud technologies. Passionate about continuous learning and software development best practices, such as writing clean code and designing microservice-oriented architectures. Skilled in using AI-powered tools like Bold, Supabase, and Lovable to optimize processes, automate tasks, and boost productivity in projects.

Work Experience

Mavalan Software

Backend Developer   January 2025 – October2025

- Development of backend functionalities using Spring Boot for a web-based system aimed at managing and improving the coffee farming sector.
- Design, management, and implementation of the PostgreSQL database, as well as deployment and maintenance of cloud services with AWS.
- Construction of the system under the principles of hexagonal architecture, promoting a decoupled and maintainable design.

Accenture

Backend Developer   August 2024 – January 2025

- I implemented secure authentication with JWT, increasing the security of REST endpoints.
- I led the base project proposal, later adopted as the main architecture of the final product, ensuring efficient collaboration through the use of Git.

Education

Backend Web Development | BeTek

Cloud Application and Service Programming | Sena

Complementary Education

Azure cloud services | Coursera

Amazon web services | Coursera

Docker fundamentals | Platzi

Kubernetes | Platzi

Habilidades

Languages and Frameworks: Java, Spring Boot

Databases: MySQL, PostgreSQL, MongoDB

Cloud y DevOps: AWS, Azure, Docker, Kubernetes

Tools: Git/GitHub, Jira, Linux

IA / Low-Code: Supabase, Lovable, Bolt, n8n, V0

Idiomas

Español: (native -C2)   **Inglés:** (B1 – intermedio)
